PERETO financial product on green financing launched through Doscredobank

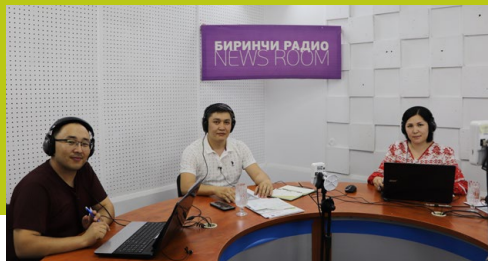

The Academy of Tourism has developed a curriculum for the implementation of ERE and SCP in the tourism sector

Practical measures for ERE and SCP were presented at republican exhibitions and conferences

ERE and SCP measures are disseminated to SMEs through the media, trainings, website and social networks

PERETO creates public awareness among Kyrgyz citizens through publishing a series of sustainable living tips on the social media. The green tips provide simple guidance to individual consumers on various topics such as how to conserve energy and water, consume sustainably, reuse & reduce waste, etc.
