Profile of study participants

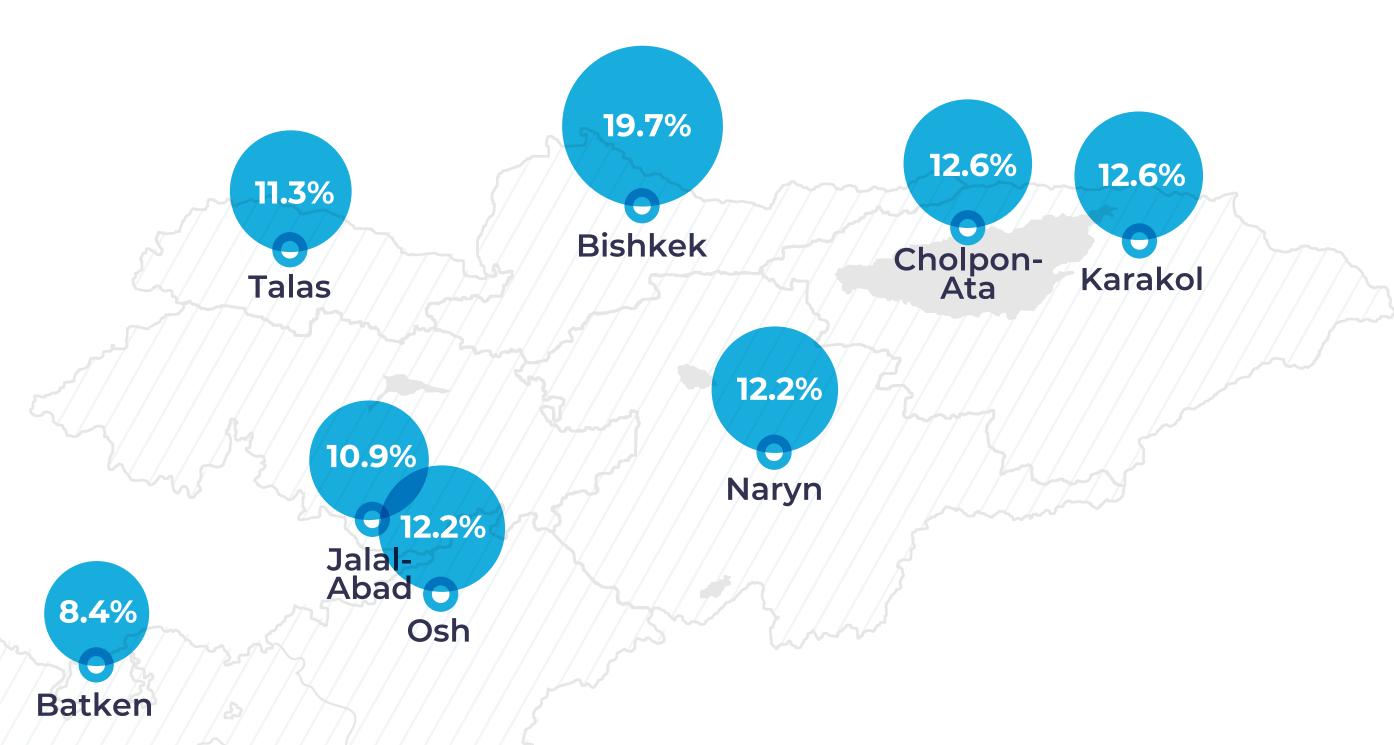

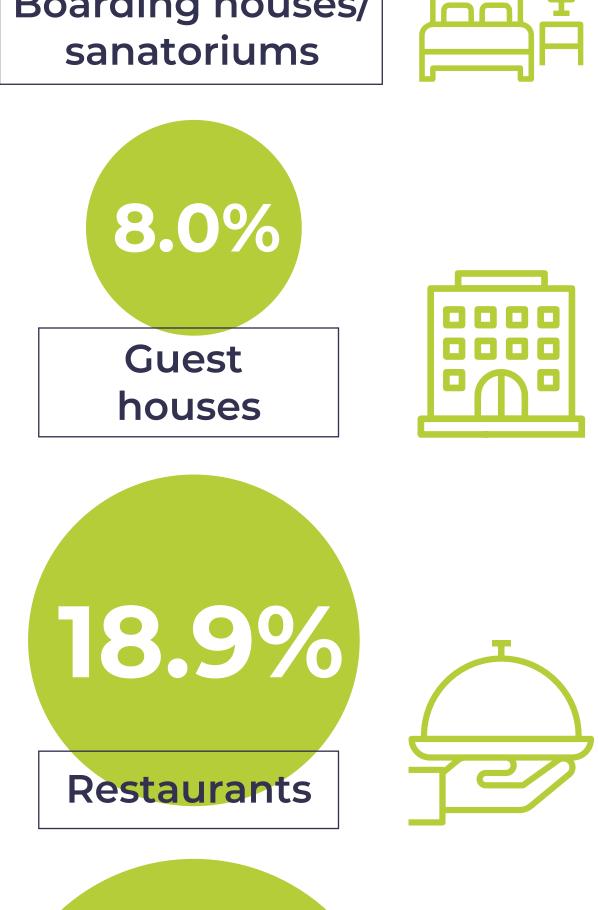

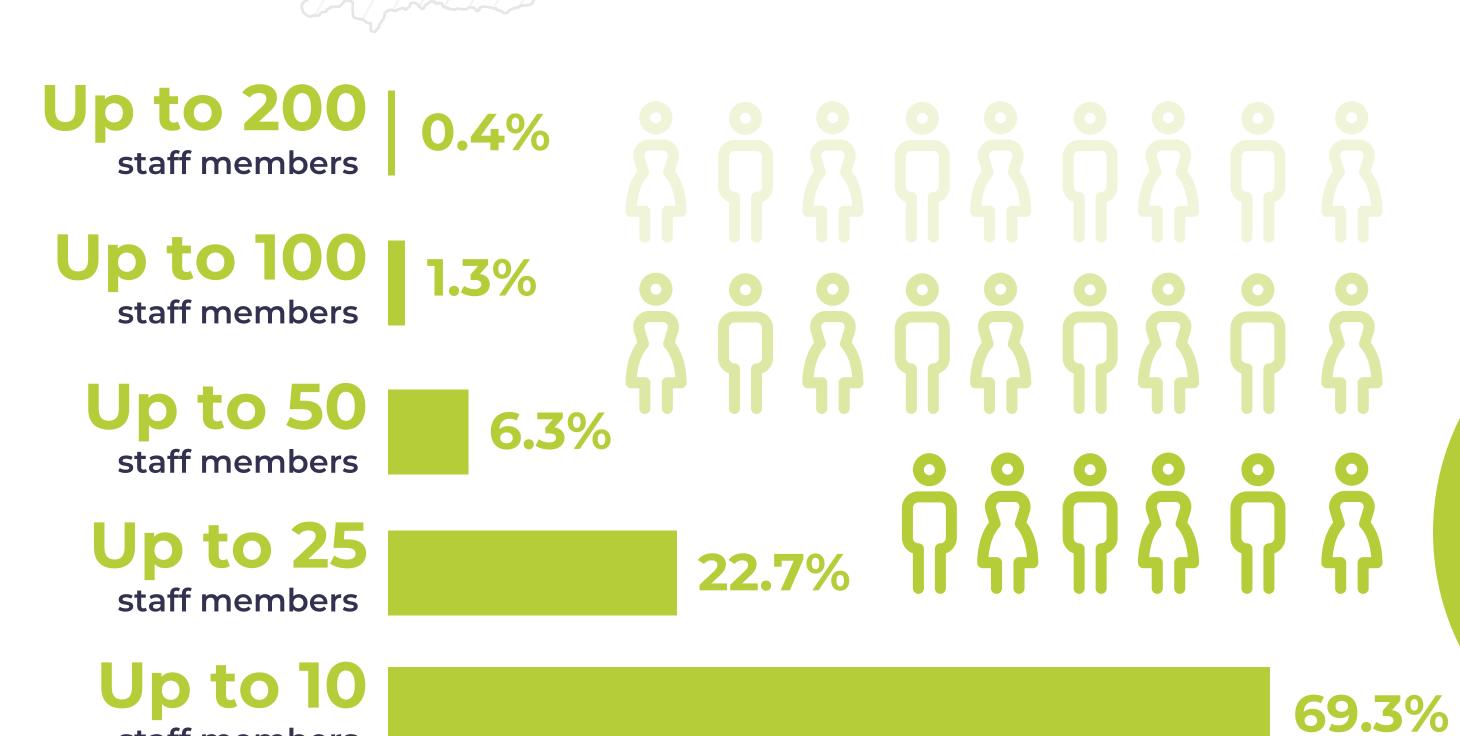

representatives of the hotel and restaurant business were interviewed

The study was conducted in August 2020

staff members

HOTEL

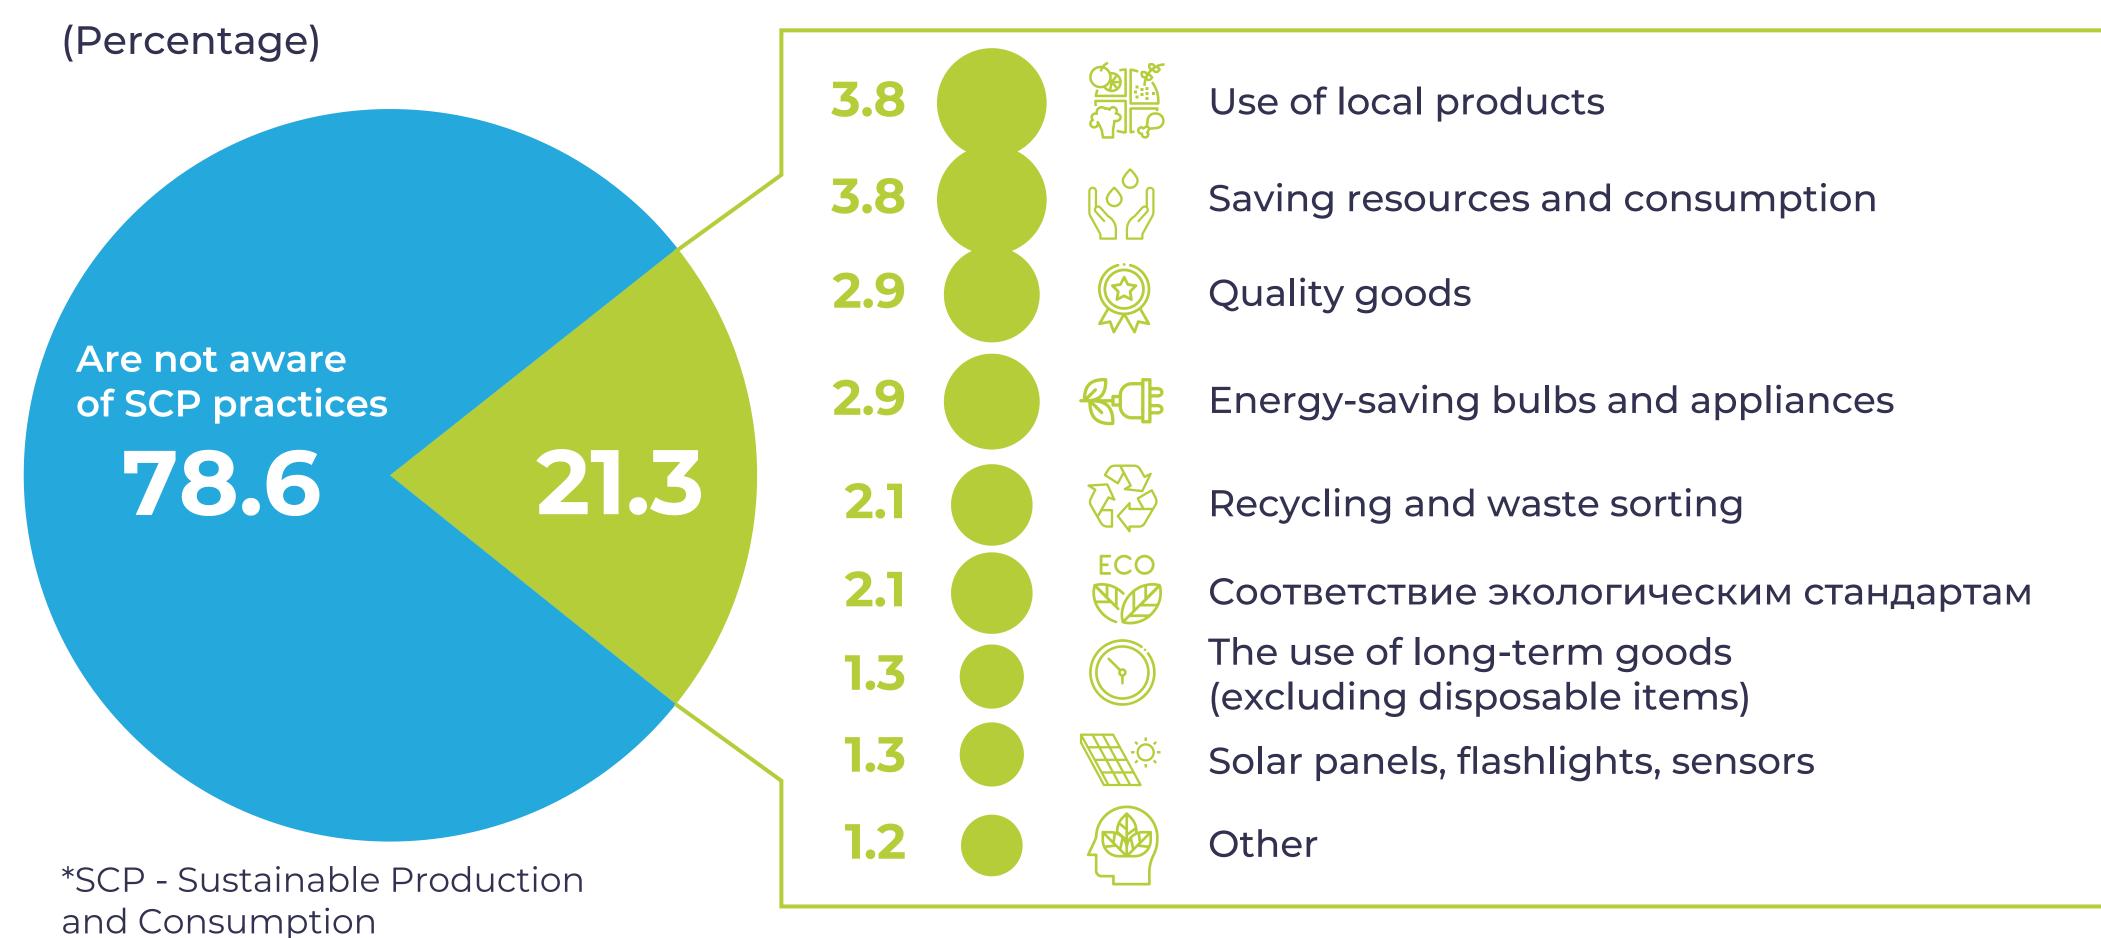

26.9%

Awareness of SCP*

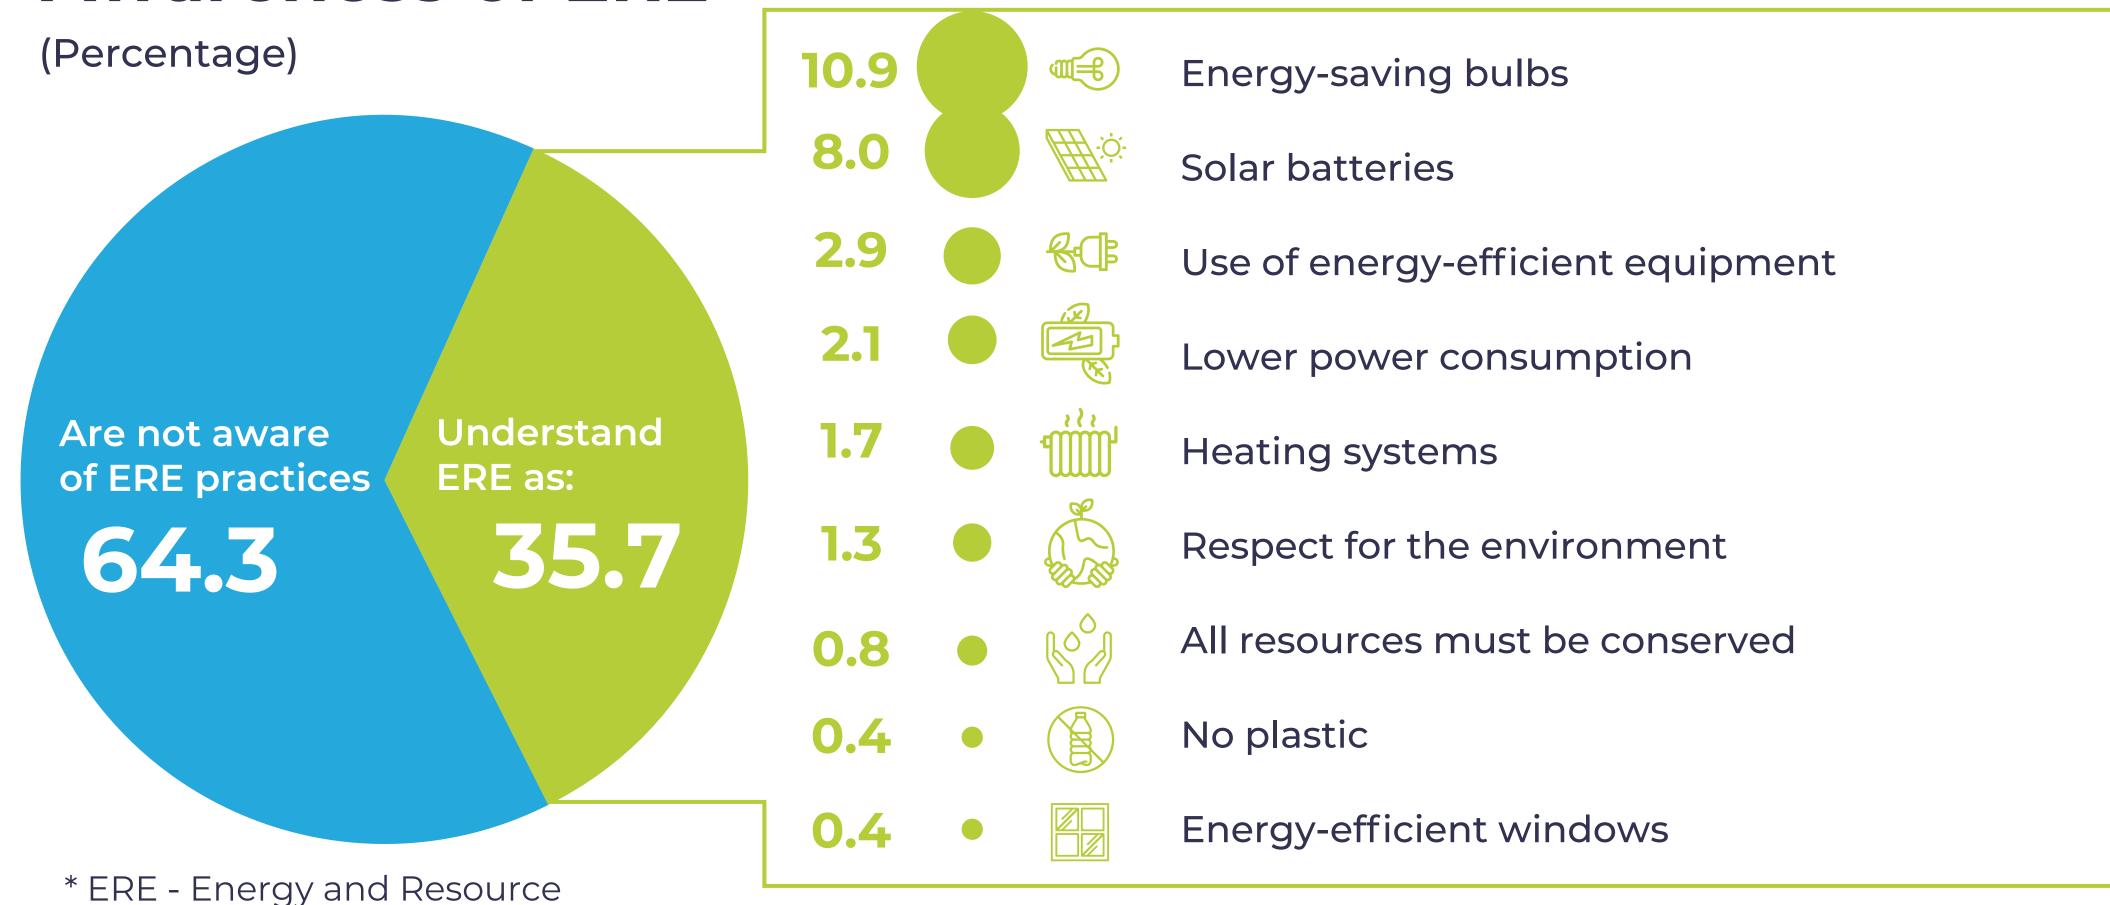

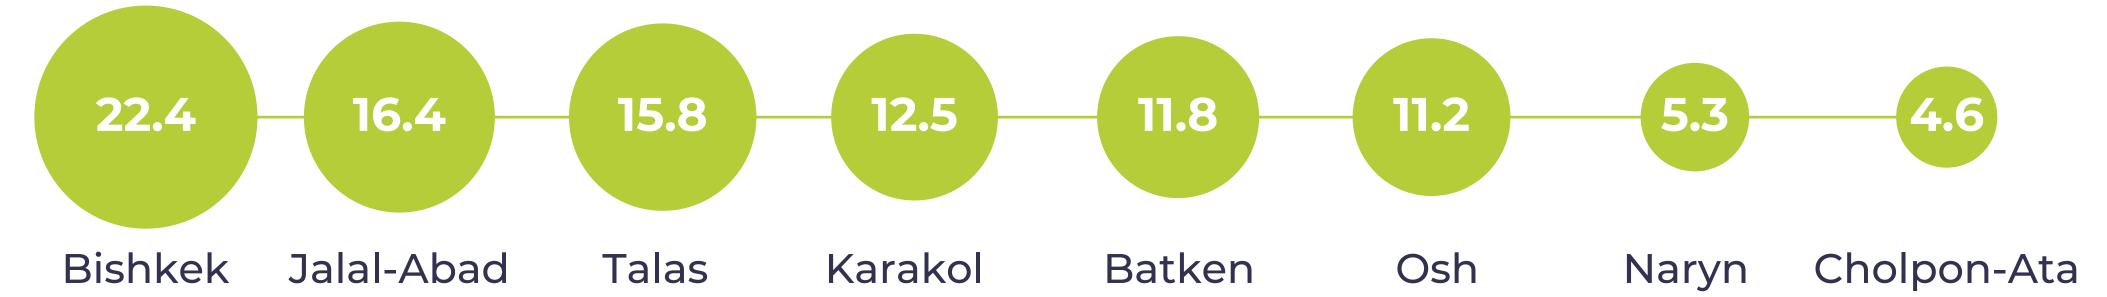

Efficiency

HoReCa representatives in Bishkek, Jalal-Abad and Talas are the most unaware of ERE

Provision of resources

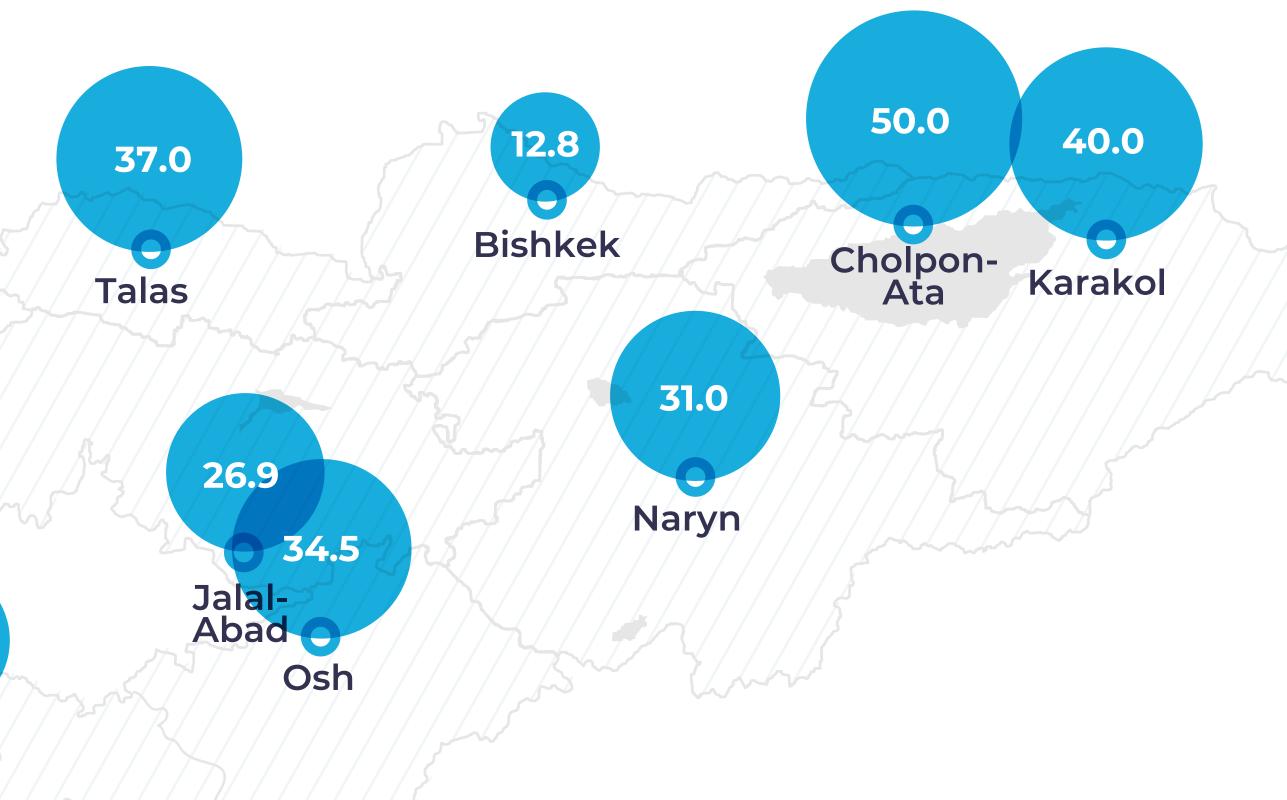

(Percentage)

The electricity and water are often cut off without warning

The main reasons:

Weather conditions (squally wind)

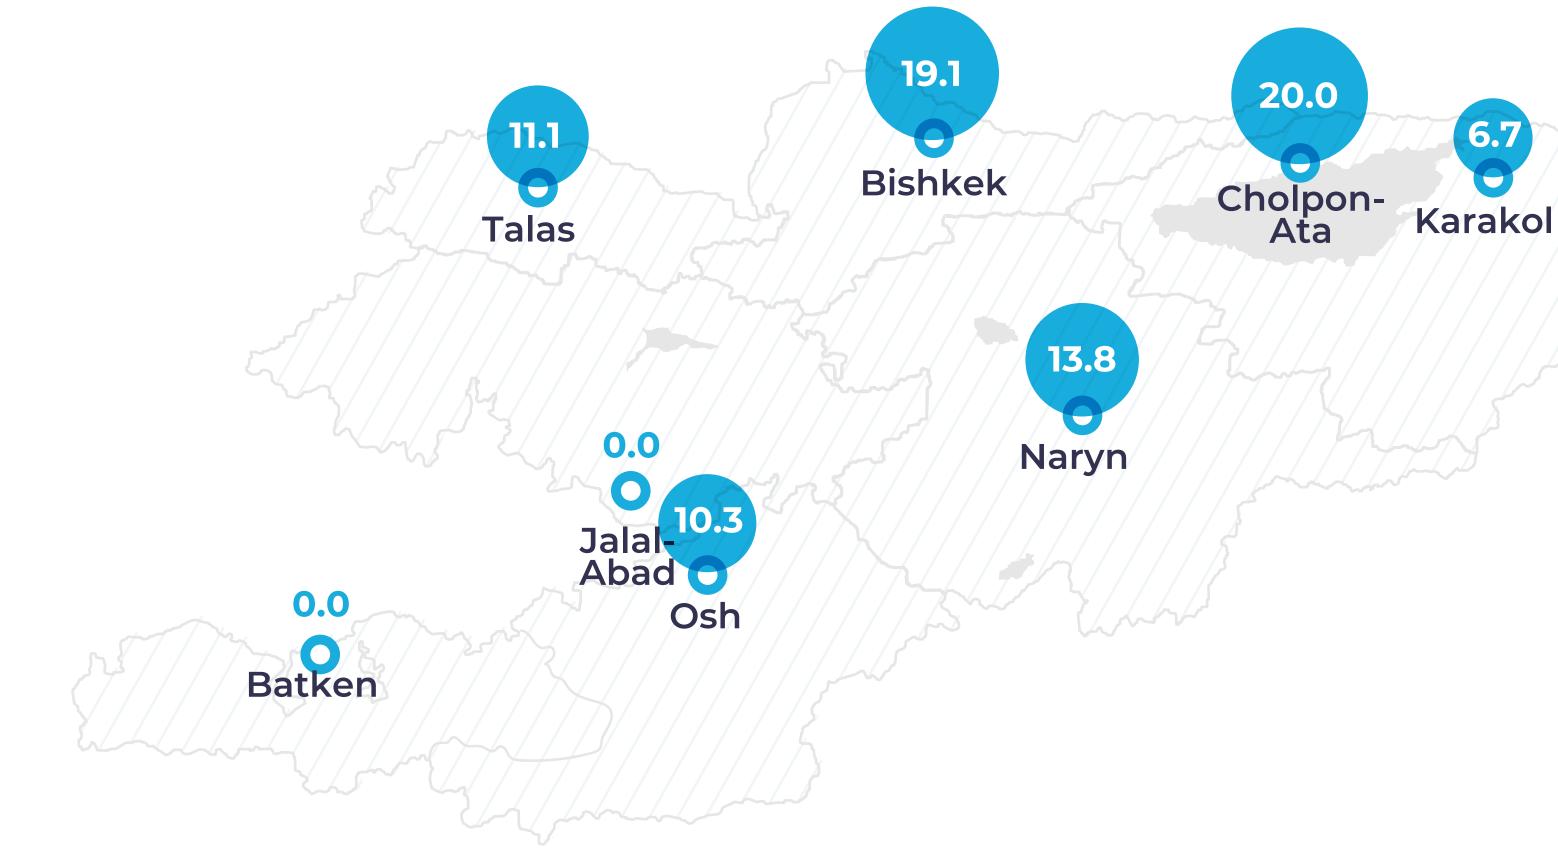

25.0

Batken

Equipment wear

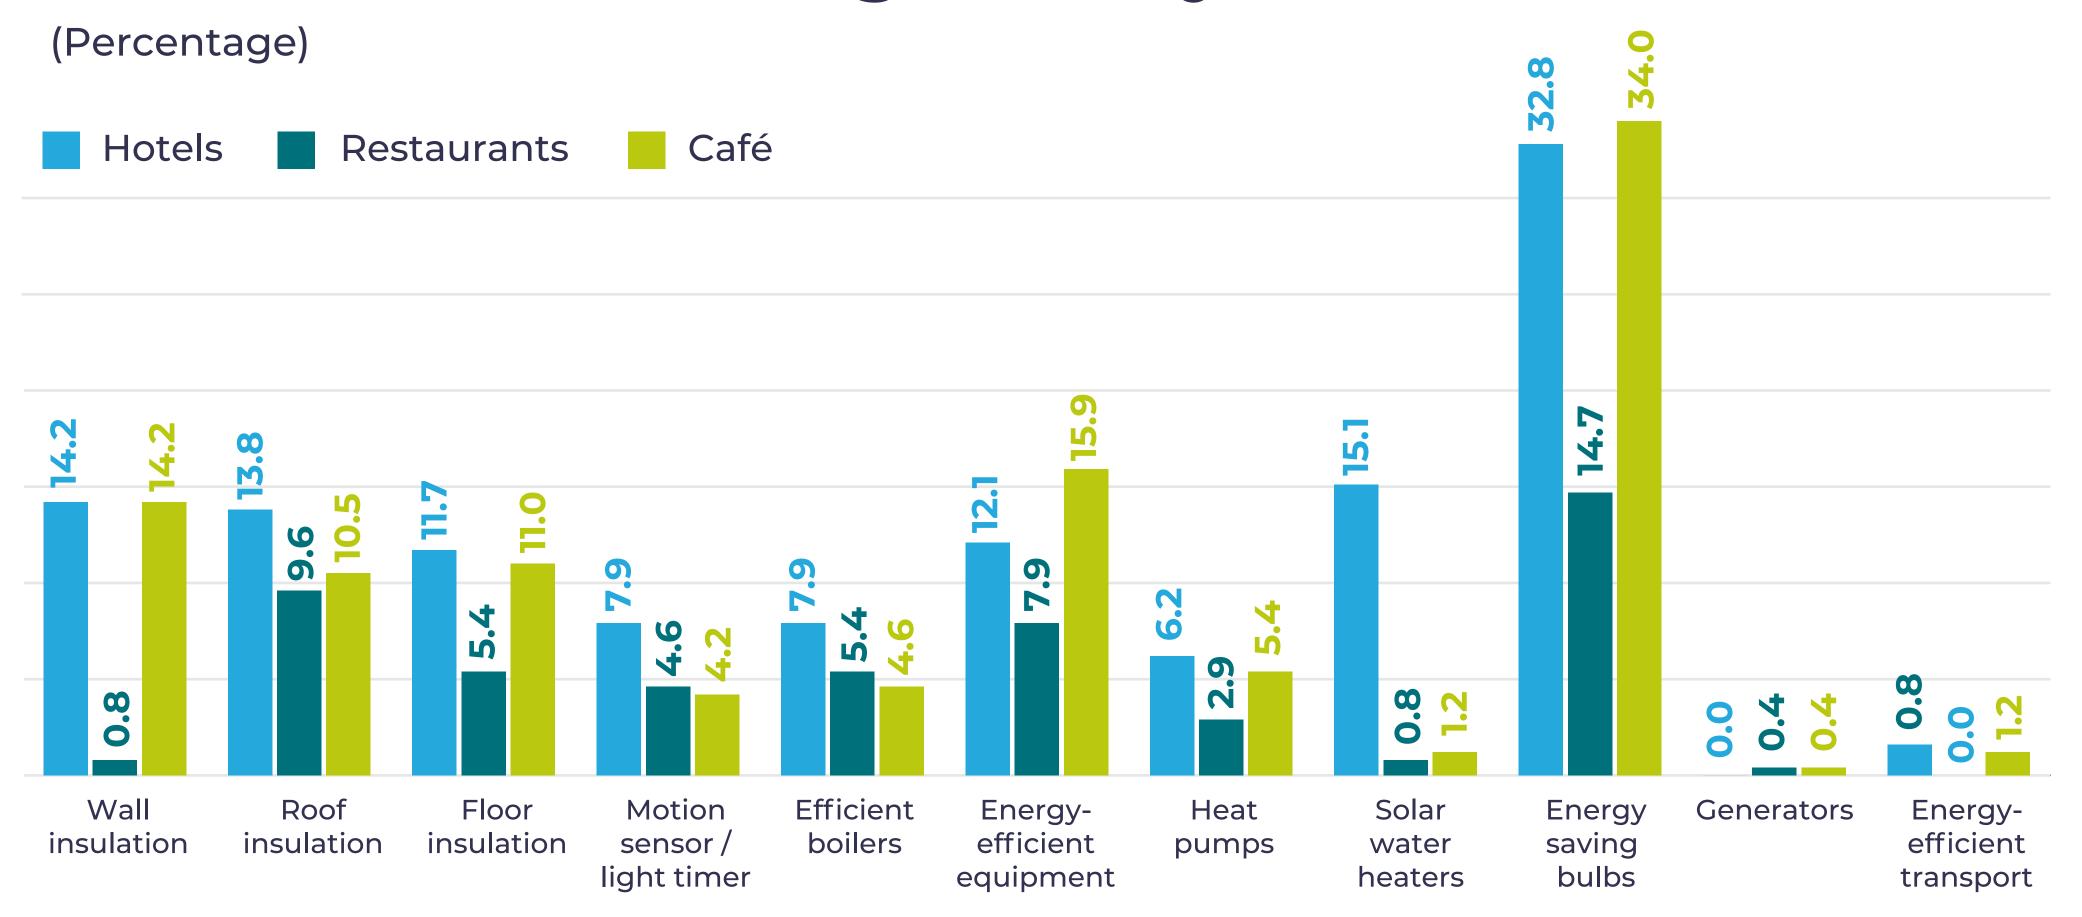

What ERE technologies they use switchasia

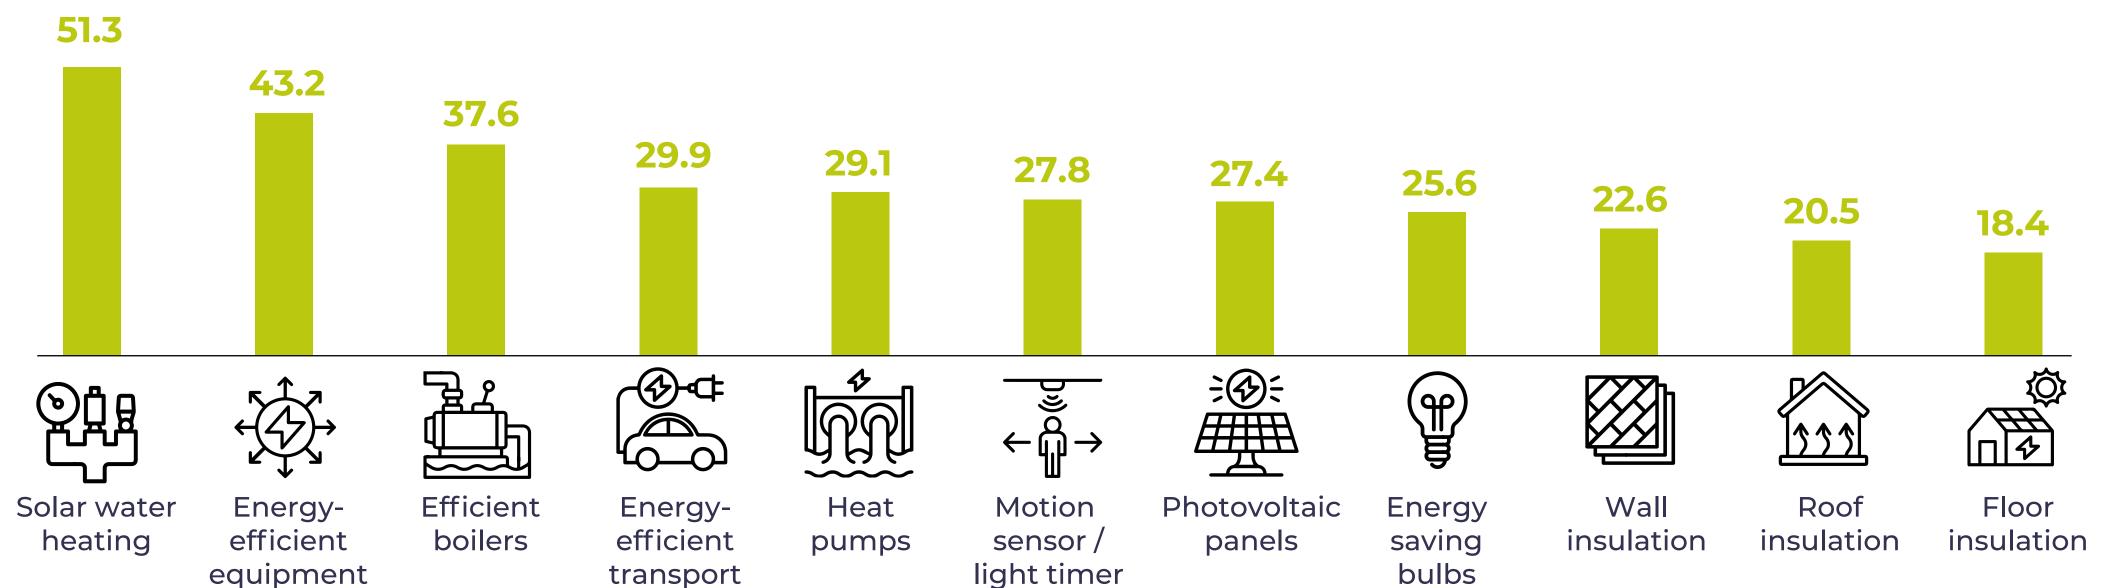

Café representatives are trying to consistently implement ERE technologies and are therefore more interested in increasing their knowledge of ERE technologies

Respondents were particularly interested in solar water heaters, energy efficient boilers, ways to install motion sensors and lighting fixtures with timers.

What they want to learn

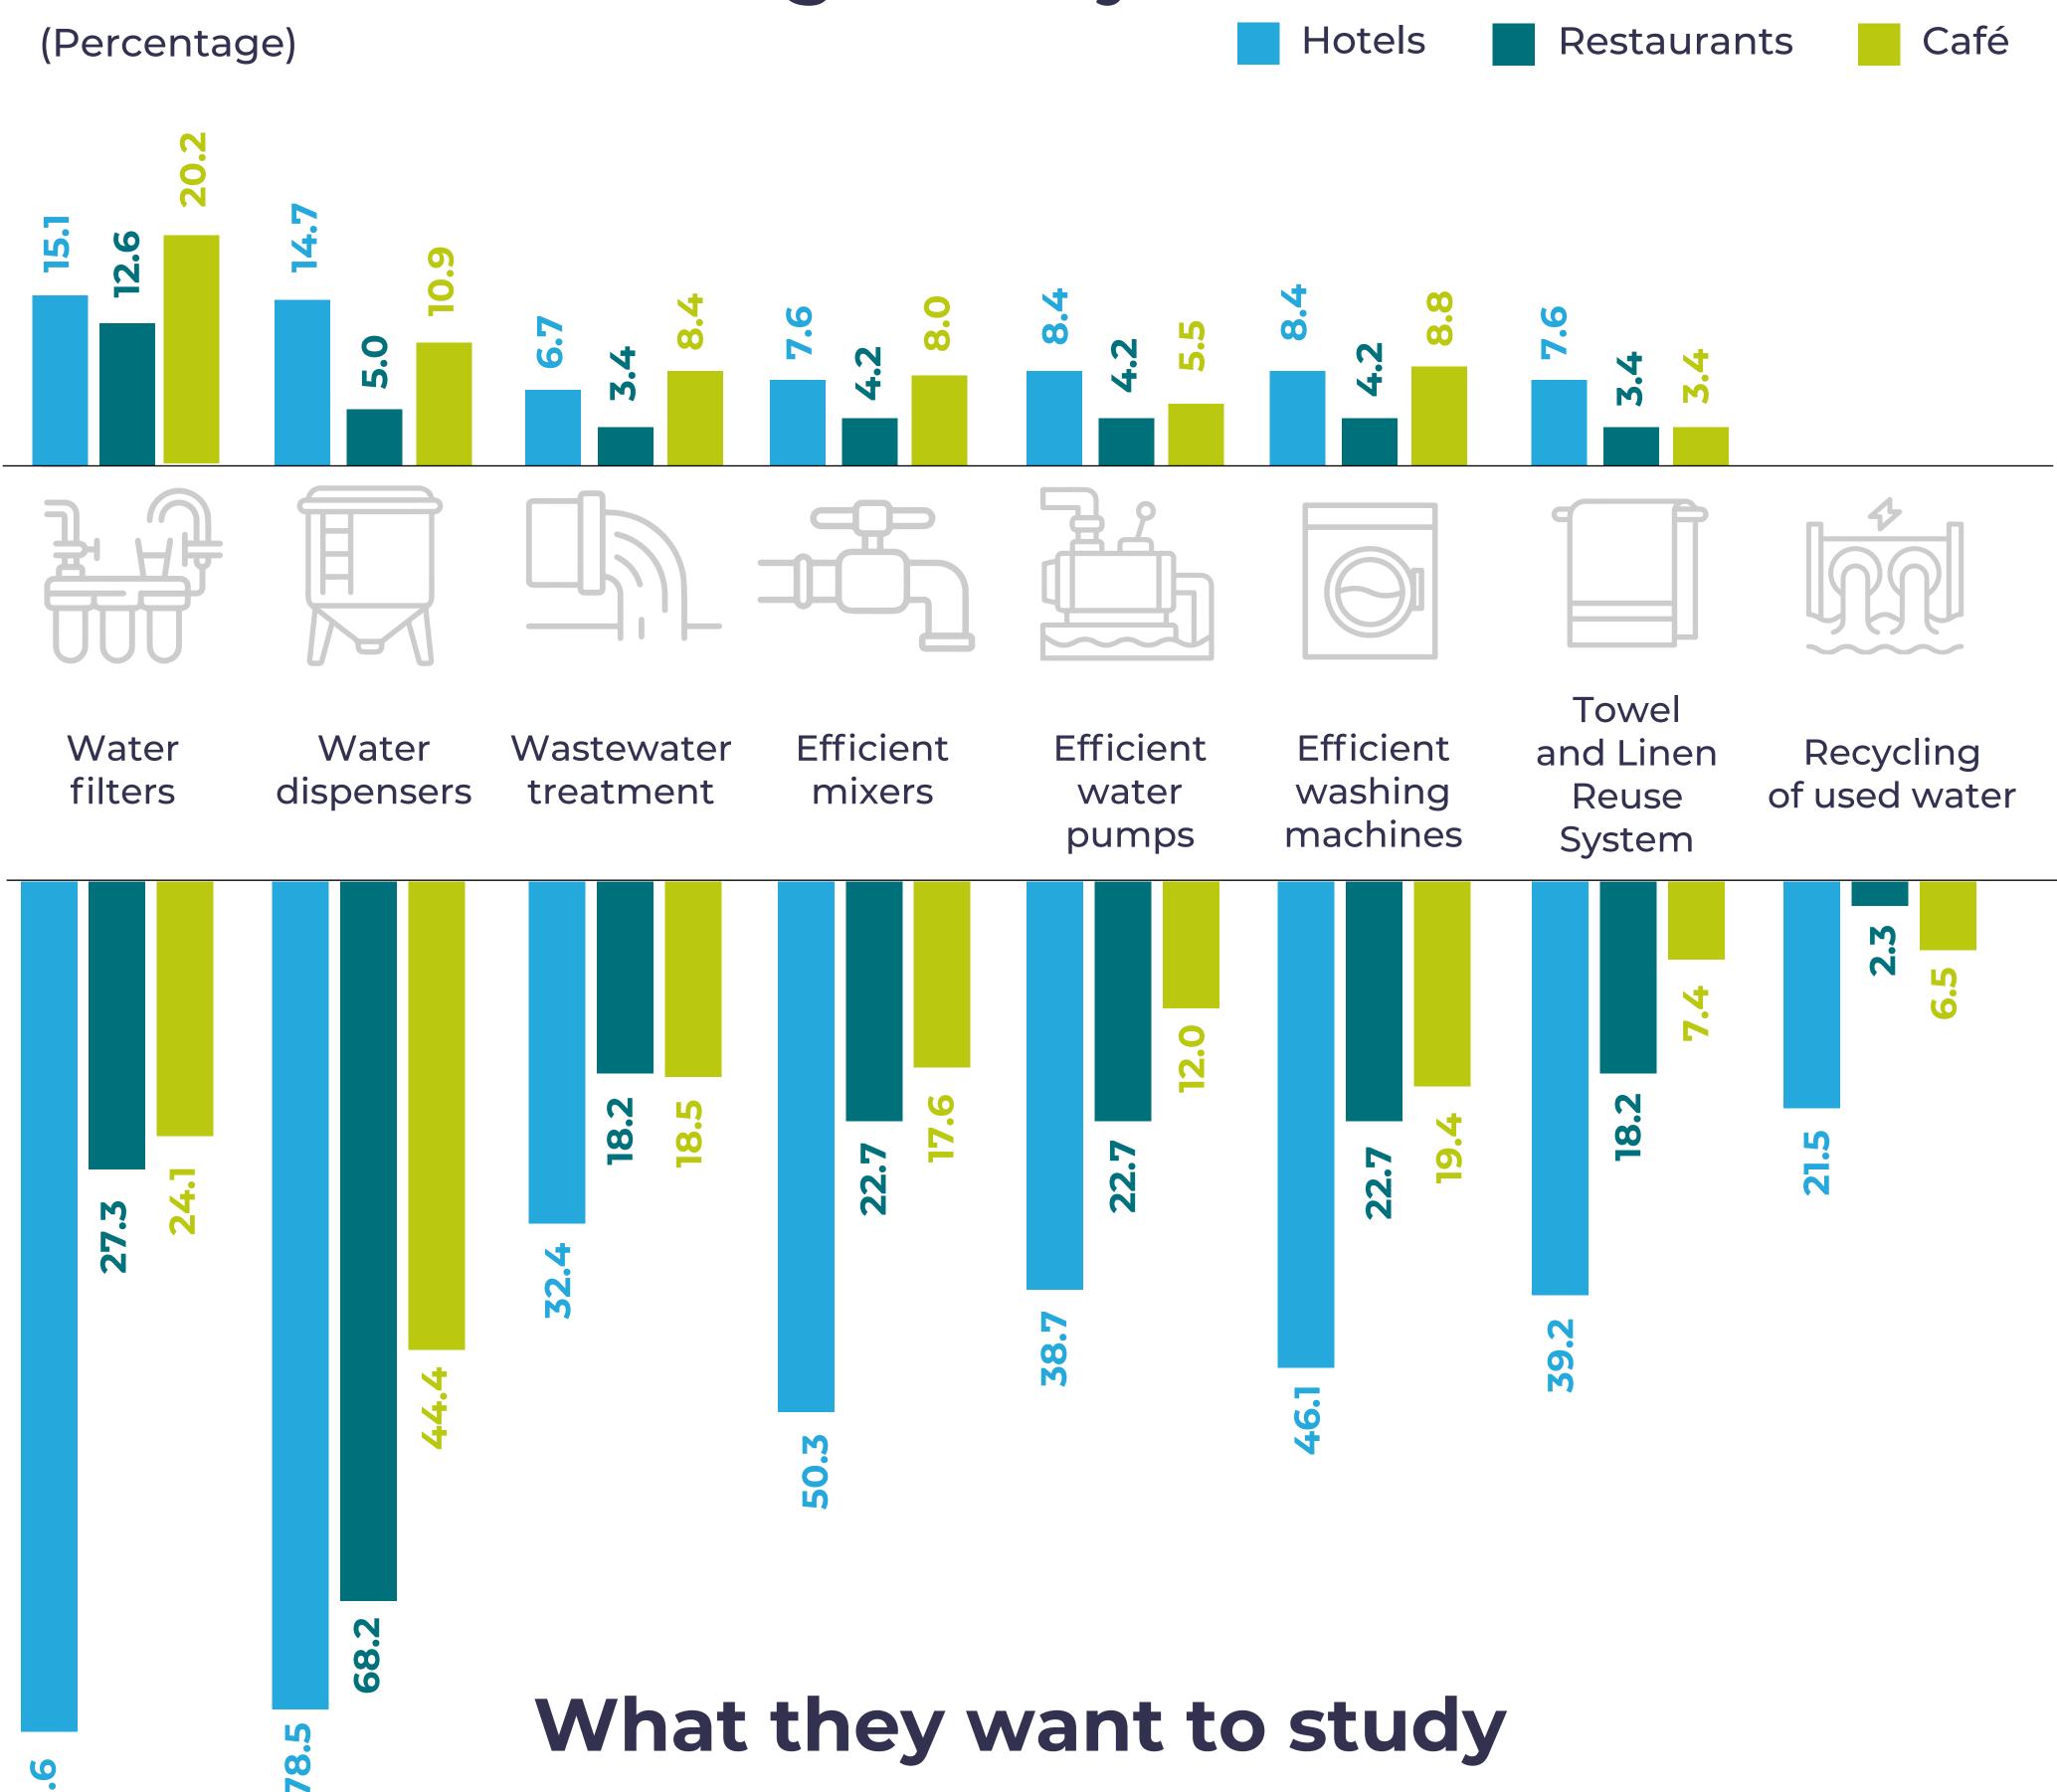

What water-saving and watertreatment technologies they use

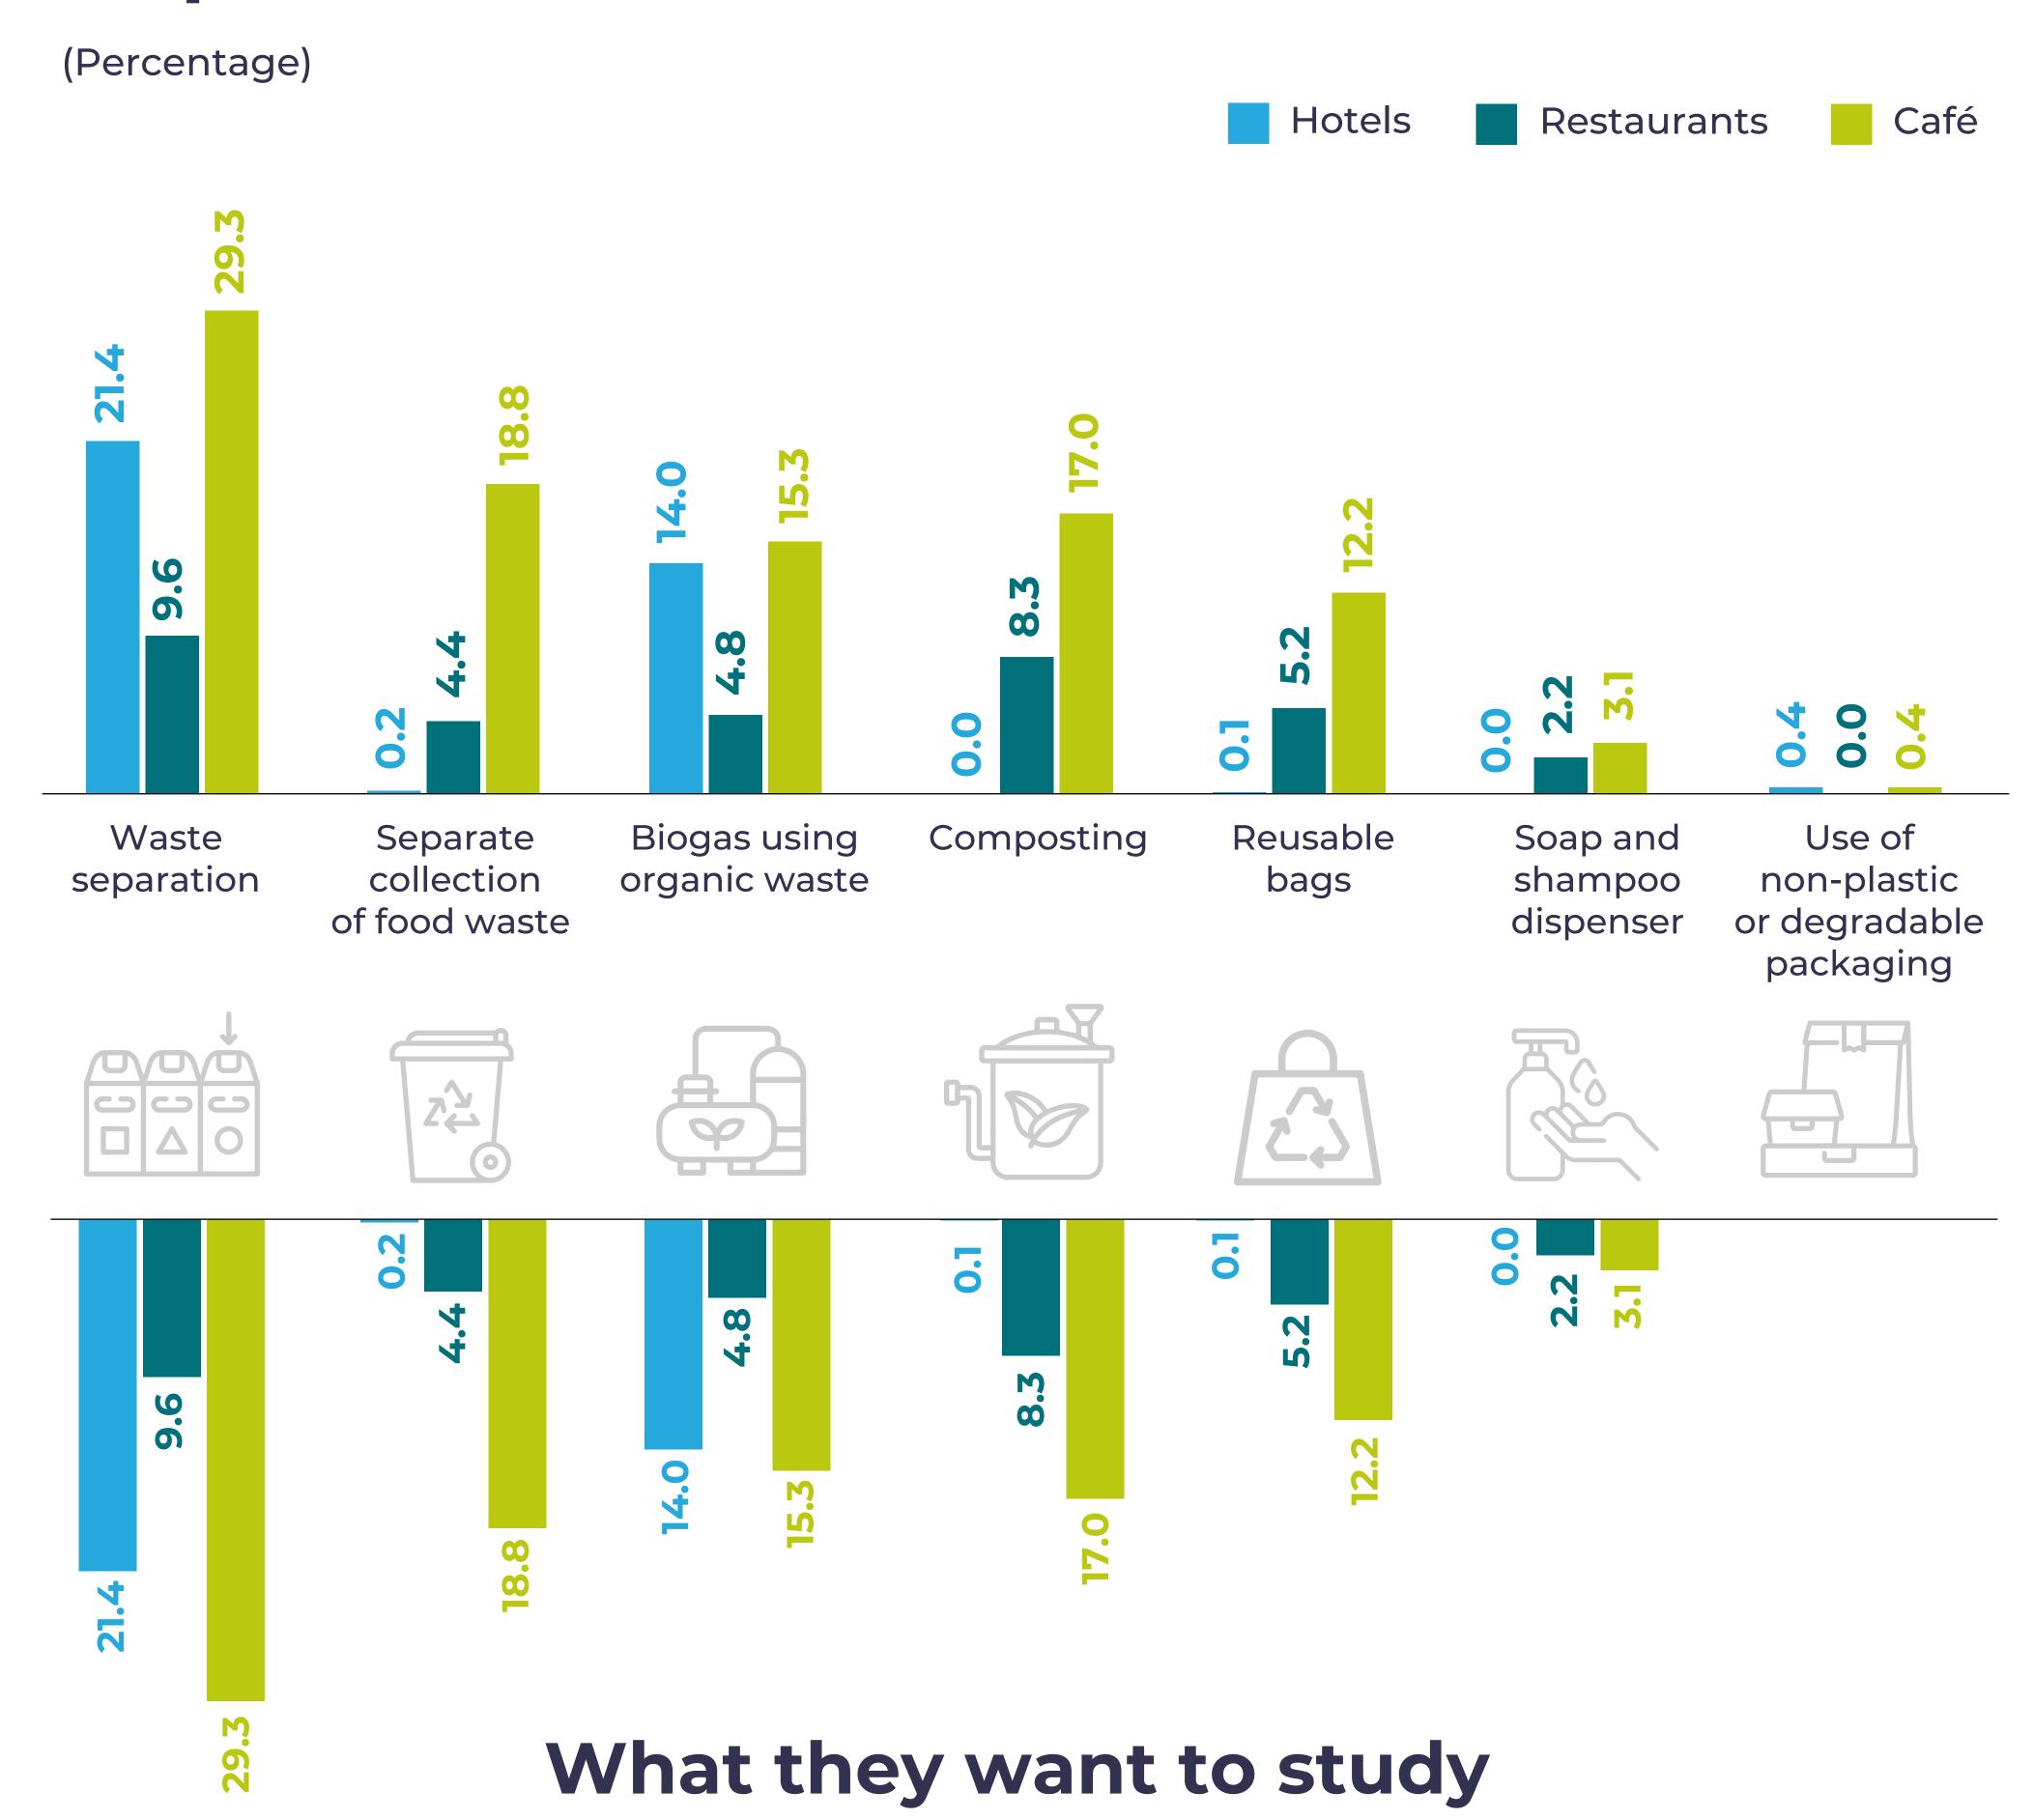

Dispose of waste

Using eco-products
